OBJECTIVE

I am a results-driven IT professional with 2.6 years of hands-on experience, specializing in SOA oriented Enterprise Service Bus (ESB) systems. My present role as a Tibco developer involves developing comprehensive solutions to the enterprise application project for a prominent UK-based telecom giant. I have a proven track record of collaborating with cross-functional teams to bridge the gap between developing deploying and delivering the enterprise applications. I have played a pivotal role in multiple releases responsible for developing and deploying the core applications within the integration layer by leveraging a diverse set of Tibco products and it's features such as x-path and custom tibco java functions. I am always excited to contribute my skills and strong problem-solving abilities to work with a dynamic team of individuals focused on delivering high-quality, resilient software solutions.

WORK EXPERIENCE

Tata Consultancy Services

[Aug 2021 – Present]

- Spearheaded the development of critical components of an enterprise application integration (EAI) project for a prominent UK-based telecom giant.
- Developed and deployed several Soap and Restful APIs within SOA integration layer by using Tibco BusinessWorks
- Interacted with various client vendors to standardize and agreeing upon xml schemas and json formats that are used in the process of designing and developing Soap and Restful APIs for Soap over xml, Rest over json and FTL over xml services using TIBCO BusinessWorks to meet the business requirements.
- Participated in the technical design discussions and headed various best practices sessions for TIBCO enthusiasts.
- Created shared library for common logging and exception handling, canonical common data model.
- Designed and created various concrete WSDL's, xml and json schemas in tibco framework for various entities to support the Common Data Model.
- Proficient in testing Soap and Restful APIs to ensure seamless functionality across uat and production environments. Handled uat testing and helped the team in debugging and resolving the critical issues and defects.
